

## AtSite, a Sustainable Buildings Company, Uses eSight to Manage Energy for Clients

AtSite, a Sustainable Buildings Company, delivers smart, cost-effective solutions to create better performing buildings and spaces with lower operating costs. Working with the best partners in the industry, AtSite specializes in managing the delivery of new buildings and interiors, guiding the modernization and retrofit of existing buildings, and providing ongoing performance management and associated energy and sustainability services. AtSite uses eSight to manage energy data from a large number of meters in a variety of buildings including commercial properties, office buildings, religious structures, hospitals, and educational campuses.

### • The Requirements

AtSite required an energy platform that they could use to manage energy data from hundreds of meters across multiple sites. AtSite wanted a Software as a Service (SaaS) model for their energy suite, in order to manage usage on behalf of their clients.

They also needed a system with a user friendly front end so that clients could log on to view energy information in preconfigured environments set up by the AtSite team. Since AtSite clients would have access to the energy platform, AtSite required a system that could be customized and tailored to fit their corporate guidelines and specific client needs.

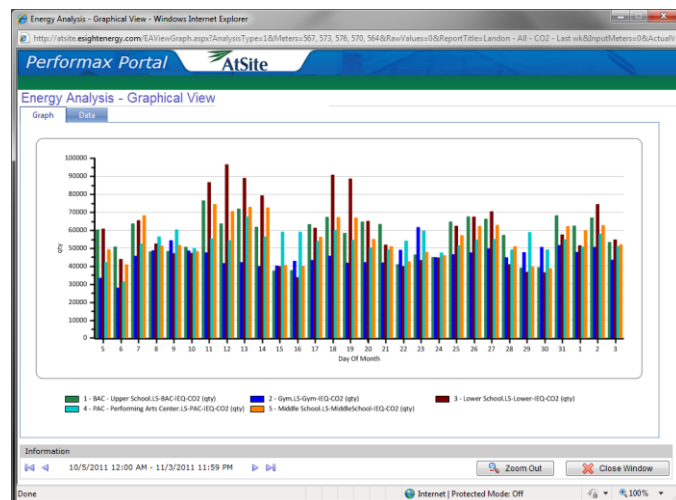

### • The Solution

AtSite chose eSight to manage energy data for their portfolio of clients. They customized the environment and adapted it to their Performax Portal. AtSite selected eSight for the sophisticated analytics, but also for the intuitive, user-friendly interface.

AtSite clients can now login to the AtSite Performax Portal branded system via Express Access to view energy and overall sustainable

data in a customized environment delivered by the AtSite team. AtSite also configure dashboards so their clients are able to display detailed energy data in a graphical interface. AtSite uses the Performax Portal to optimize energy usage and identify cost savings across many different building types including the USGBC headquarters.

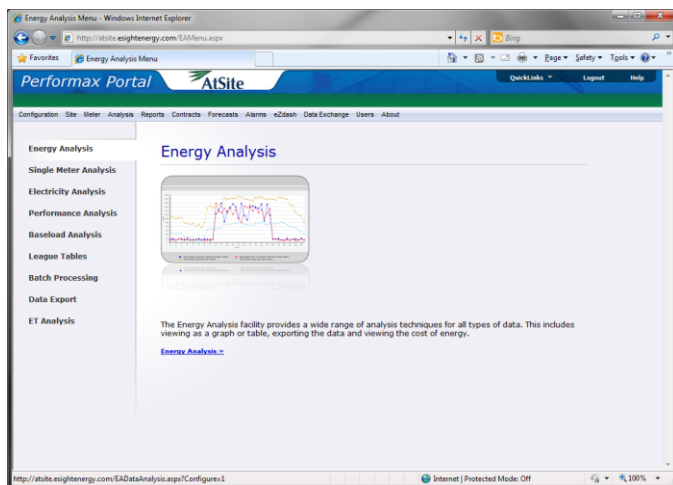

"Using our Performax Portal and innovative approach to performance management, we are able to leverage our partnership with eSight Energy to provide best-in-class global technology and analysis resources to optimize energy and sustainable services across our client building portfolios."

**Davor Kapelina**  
President

## ◆ AtSite Branding - Performax Portal

Since, AtSite gives its clients Express Access to their energy platform, they required a system where the environment could be customized and adapted to their specific corporate guidelines. AtSite chose to customize the eSight suite and incorporate it into their Performax Portal. When AtSite clients logon to the Performax Portal they see system as shown below.

eSight Energy offers four levels of standard branding options. eSight is available for branding, from simply replacing a logo to full OEM product.

AtSite has chosen branding level 3. Branding level 3 offers the ability to replace the eSight Energy logo and banner image on each page and also change the product name; as AtSite have done to 'Performax Portal'.

"This partnership (with eSight Energy) helps us deliver recurring cost savings and performance benchmarking on energy, sustainability and carbon emissions."

**Davor Kapelina**  
President

## ◆ About eSight Energy, Inc.

Brought to you by eSight Energy, Inc., eSight is the most sophisticated and comprehensive energy suite available. Built upon the very latest Microsoft technology, the eSight suite provides an extensive range of techniques for analyzing energy usage and targeting sites for savings.

eSight may be used to monitor data from virtually any energy related system including meters and loggers, building management and control systems, production data, spreadsheets, supplier data, oBIX and OPC data.

Please contact us for further information on how eSight can help your organization save money.

## ◆ Outsourced Energy Services

AtSite manages a building's sustainability and ongoing performance, in real-time, using their Performax Portal.

AtSite is a Customer and Partner of eSight Energy, Inc. eSight Energy recommends AtSite to clients who require a strategic approach to sustainability and energy management, along with a diverse set of consulting services.
