# Changes to the hosted environment

*We have relocated our hosting servers!*

## Facilities

- 100Mbps internet connection
- Two lines on different lines ISP's
- UPS and onsite generators
- High security access

## Benefits

- Faster access to eSight
- More resilient to internet problems
- More resilient to power outages

## eSight Product Range

*eSight is now available in three versions*

**eSight enterprise** is targeted at medium to large organisations. It is either installed to site or hosted by eSight Energy for use over the Internet.

**eSight subscription** is a 'software as a service' model. Paid on an annual subscription basis and accessed over the Internet.

**eSight essential** is available to purchase online and is for use on smaller buildings. It is sold as a one off purchase and no annual fees

## Get the most from today

- This is the third user group meeting we have held this year. One in March located in **Reading**, another in **Chicago** last month for our US customers and this one today in **Manchester**.
- Hughes Energy Systems also hosted a user group meeting earlier this month in Northern Ireland.
- There will be others planned for elsewhere in Europe next year.
- The events are run to continue to build the eSight community and ensure you are aware of how others use eSight and to also update you on new features coming soon.
- Please use the feedback forms.
- Enjoy the day!
